A wrestling exhibition will be staged at the opera house tomorrow night between Uruus the Great and Sam Clapham.

Mr. J. Menard, formerly business manager of the West Canadian Collieries, has severed his connection with this company.

President Smith Resigns

The resignation of J. E. Smith as president of District 18, United Mine Workers of America, is announced, following a request from the Bellevue local union on the grounds of general inefficiency. Smith went into office over Clem Stabbs, who resigned owing to the question as to whether the United Mine Workers, District 18, should be controlled as a political organization, or continue as a mere labor or trade union. He took the ground that the men in District 18 had gone on record as in favor of the Socialist party, and he contested the office and won out on this issue.

W. L. Phillips, of Fernie, a strong supporter of the miners' cause and a leader in the Socialist ranks, is mentioned as a likely candidate for the presidency.

Revised Methodist Stations

The revised list of stations approved by the Alberta Conference of the Methodist church, includes the following for the Macleod district:

Macleod—Austin D. Richard, B. A.

Macleod S.—J. A. Barker.

Clareholm—James H. Harrison.

Pincher Creek—Alfred A. Lytle.

Fishburn—F. J. Halgoud.

Livingstone—T. W. Read.

Bellevue—F. T. Cook.

Hillcrest—T. Hart.

Frank—W. T. Young.

The district officials are as follows:

District chairman—J. M. Harrison.

District Financial Secretary—A. A. Lytle.

Sunday School Secretary—W. T. Young.

School Play A Huge Success

The school play given in the opera house on Friday night last, under the direction of Mrs. Leonora Shaw Brown, was the largest attended and most enjoyed affair ever staged in Blairmore. It is estimated that over five hundred people attended to witness the work of some 150 school children. The programme throughout, which lasted three hours, was faultlessly rendered, showing not only the possibilities of our young folks as entertainers, but the ability of Mrs. Brown as a trainer. For several weeks Mrs. Brown has been busy with her staff of amateur, and every spark of wit in the youngsters has been availed of. In justice to the children, it would not be fair on our part to quote any particular character, for all performed their part admirably to the appreciation of the vast audience. Mrs. Brown and the teachers of the local school deserve great credit for the success of the affair, the object of which was a noble one and was reached in point of finance, for we understand that over \$70 was netted for the purpose of supplementing the school library.

We understand it is the intention to make this event an annual affair, which will be looked forward to with interest by everyone interested in the education and welfare of our young people. In the past too much unearthed talent has been allowed to rest dormant, instead of being utilized for the benefit of our home folks.

According to rumors, a railroad to be known as the Western Dominion will shortly start down from Calgary through the oil fields and on to the international boundary south of Cardston, where it will link up the ties of John D. Rockefeller. The new road will pass down through the Waldron ranch to Landbrook, thence through Welsh's potato garden and on to Pincher Creek and Cardston.

Court of Revision

The sitting of the council as a court of revision to consider appeals against assessments took place at the council chamber on Thursday forenoon, Councillors Sinclair, Dutil, Beebe and Rosse being present. A number of appeals were considered and satisfactorily adjusted. The appeals of the West Canadian Collieries and W. A. Beebe were laid over for consideration at some future date.

A. E. Stillman Among The Empress Victims

On the Empress of Ireland which went down in the St. Lawrence on Friday morning last, after being rammed by the Norwegian collier Storstad, were many west Canadians. Included in the number were many prominent figures in the social and business life of the western provinces. Among the number was Mr. A. E. Stillman, general manager of the W. J. Budd Co., at Calgary. Mr. Stillman's body was recovered from the wreck on Tuesday, and is being brought to Calgary for interment.

Mr. Stillman was well known throughout Alberta, and had many friends in the Crow's Nest Pass, where he has had occasion to make frequent visits in the interest of his firm. His last visit to Blairmore was slightly over a month ago. He was but twenty-six years of age, and leaves a wife, a bride of but sixteen months. Lawrence Irving, the noted actor, and his wife were also among the victims of that fatal trip. From latest figures the number of lives lost in the Empress was 967, mainly passengers, the majority of the ship's crew having been saved. An inquiry into the disaster is being held at Quebec this week.

The first complete official figures furnished by the C.P.R. company late Tuesday night, of the Empress of Ireland disaster, shows a total of 452 saved, making 1,024 lost, as the total number on board was 1,476 passengers and crew. The following is a summary:

The rescued—First class 36; second class 47; third class 136; officers and crew 238.

The missing—First class 56; second class 209; third class 582; officers and crew 180.

Identified dead—First class 22; second class 31; third class 30; officers and crew 12.

When the Empress of Ireland sailed from Quebec last Thursday afternoon she had on board 1,476 souls, as follows:

First class 89; second class 256; third class 718; officers and crew 413. Total 1,476.

Course for Cadet

Instructors

Arrangements are being made for a course of instruction at Calgary for school teachers who desire to qualify as Cadet Instructors. The course will begin about July 1st and will occupy about six weeks. The number of applicants accepted will be limited to fifty male teachers. Transportation to and from Calgary will be provided for all accepted candidates and during the course an allowance of \$1.00 per day in addition to \$1.00 per day for subsistence will be made by the Department of Militia and Defence.

Teachers who have not already taken the course and who desire to do so should make application at once to the District Officer Commanding Military District No. 18, Calgary, Alberta.

Rev. W. H. Irwin, who has had charge of the Methodist mission work at Bellevue for the past two or three years, is being transferred to Athabasca.

Blairmore defeated Coleman at baseball last evening to the tune of 8 to 7. An excellent game was put up by both teams. J. A. Osborne refereed.

Murderers Captured

All of the three bandits who committed the robbery and murdered bank manager Wilson at Exshaw recently have been captured by the mounted police. The second capture resulted in the recovery of the stolen money—\$2,314.50. The third capture was effected in the cellar of a vacant store in Calgary, where the bandit had lodged himself, armed with a 9 m. Luger automatic revolver and sixty shells. In order to effect the capture the firemen were called out and a hose directed through a hole in the floor flooded the place and drove the desperado to surrender. The trial of the three will take place at Calgary next week.

AVIS

Tous les dimanches, a 3 h 4 un service religieux est célébré en français, dans l'Eglise Presbyterienne, en face de la station. Tous les habitants de Blairmore et environs parlant et comprenant le français, sont très cordialement invités à assister a ce service qui a etc cree spécialement pour eux.

Last night's rain storm was welcomed by people on the prairie.

The Blairmore town council will meet on Monday night next.

William Grant, license inspector, left for points north this morning.

An election for the office of president of District 18, U.M.W. of A. takes place on June 26th. Nominations are to be in the district office not later than the 17th.

Blairmore, Alta., Fri. June 5, 1914

Down in Alberta they say: "All roads
lead to Ponoka." The oil route now be-
ing open will sh. doubt, be added to the
list.—George Melick.

A big shoal of suckers are running
in Alberta, and the oil stock sharks
are getting fatter every day. The fool
and his money are soon divided. Seven-
teen years ago in Toronto, the suckers
grabbed Rosinold will-out stocks in the
same way, and they have not yet quit
cursing R.C.—Greenwood Ledger.

To the general public it seemed almost
impossible that the news could be true,
especially of the Empress of Ireland.
The Empresses have always held the ad-
miration of Canada; they were some-
thing of an achievement when they were
put on the run, and they have held to
their good record for year after year.
People might shake their heads if one
spoke of sailing on some other ship, but
if it were the Empress of Ireland, or her
sister, people seemed to think that all
could be well, and every one when they
read or heard of the horrible disaster
first gasped, "The Empress," and then
began to realize that hundreds of
lives had been lost, that hundreds of men
and women had gone down to their
death.—Sydney Post.

Alcohol and Efficiency

Does anyone doubt the impairment of
efficiency by alcohol? The Christian
Guardian publishes these statements:
"It is a very old delusion that alcohol
adds energy, and although today the
delusion is less tenable than ever, it is
hard to kill. And yet every new scien-
tific study of alcohol helps to demon-
strate more conclusively than ever that
alcohol is a foe to work." Professor Emil
Krapelin, of Munich University, has
been making some remarkable experi-
ments in this direction, using the ergo-
graph. He first took a total abstinence
and measured his muscular efficiency
times a day for some weeks. He then
gave the man a glass of Bordeaux with
each meal and proceeded with his
measurements. In every case the worker
showed a decline in efficiency ranging
between 7.5 and 8 per cent. After ex-
perimenting with a number of Germans
the professor tried the same experiment with
men of other races and under different
climatic conditions with practically the
same results.

"He then proceeded to experiment as
to the effect of alcohol upon the mental
powers. He tested the ability of some
accountants to add long columns of fig-
ures. They first worked without alcohol,
and then each was given four cups of
claret a day. On the very first day their
work fell off 3.1 per cent, and it steadily
declined until at the end of two weeks
the loss was 14.3 per cent in daily effi-
ciency. His next experiment was with
printer's composition and one week of
alcohol lessened their speed 9.6 per cent.
"In all these cases there was no evi-
dence of intoxication, and doubtless each
man would have denied that his working
efficiency was impaired in the slightest
degree, but the tests showed otherwise."
It is now pretty generally known that
alcoholic liquors, even in moderation,
lessen muscular and mental power, and
a young man seeking a position is usually
asked two questions: "Do you drink?"
"Do you smoke?"

New Oil Company

(Special Leased Wire.)

Bellevue, Alberta, Monday, June
1st, 1914.—The Johnston Syndi-
cate was organized here in the
Lyric Theatre tonight, and the
following officers were elected:

President—C. W. Johnston.

Vice-Pres.—S. T. Humble.

Secretary-Treas.—J. H. Robert-
son.

The company is composed of
business men of Bellevue, and have
been very fortunate in securing
some very choice Mud Lake oil
land, which Mr. Johnston located
last week. Some very tempting
offers were received from Van-
couver capitalists, but it has not been
decided whether to accept them or
not. There is no doubt but that
in the near future leases in the
Mud Lake vicinity will command
big prices.

D. Hyalop officiated at the Hill-
crest Methodist church on Sunday
night, in the absence of Rev. J. C.
Anglin, who is attending conference
at Calgary.

Edward Michener

Is Optimistic

Edward Michener, leader of the
Conservative party in Alberta, was
the honored guest of the Edmonton
Industrial Association recently and
incidentally was the principal
speaker. He optimistically spoke
about the natural resources of the
province, commented on the oil
speculation, gave statistics as to the
wealth of Alberta, and compared
them with the other provinces.

Referring to the present mad
rush for oil shares, he said: "More
money will be put into oil wells in
the next five years than will be
taken out of them, and the province
at the present time had far more
speculators than producers. The basis
of wealth for a good many years
to come would depend much
on the farmers of the country.
Alberta has the richest soil in
Canada, and this has been proven
by analysis, and there are twenty
times the productive qualities here
than in the clays of the eastern
provinces. Agriculture was not
the only basis of industry in the
province, but mixed farming has a
great deal to do with it. We have
14 1/2 per cent of the resources of the
world." These statements were
part of a stirring outburst of optimism
from the Conservative
leader.

Premier Sifton's Views On Railway Loan

Edmonton, Alta., June 4.—Discuss-
ing the financial position of Alberta,
Premier Sifton, who has just returned
from Europe, said at the parliament
building here that the province is
now practically free from indebted-
ness on treasury bills, which have
been replaced by 10 year bonds, say-
ing also that the manager of Lloyd's
bank in London had assured him
that conditions are highly satisfac-
tory. Continuing he said:

"While it does not make much
difference to the actual indebtedness
of the province, as we still owe the
money, the bonds are not redeemable
for 10 years. It is regarded as much
satisfactory to have the indebtedness
in this form, as it relieves the province
from immediate worries about the
possibility of being able to renew our
notes in the course of a few months.
We have sufficient money in hand
to carry on the business of the
province with economy during the
current year."

Premier Sifton then gave his views
in respect to the proposed loan of
\$45,000,000 to the Canadian Northern
Railway company by the Dominion
government, saying:

"Morally, though perhaps not
legally, the taking of a second mort-
gage by the Dominion government
on the property, which bore a first
mortgage in the name of the province,
relieved the province of its liability
to the Canadian Northern." From
the point of view solely of provincial
finances, the proposals of the
Canadian government in respect to the
Canadian Northern appeared to be
satisfactory as relieving the province
of obligations it had taken upon
itself in guaranteeing the bonds of
the company to build lines in Al-
berta. The Dominion government's
mortgage covered not only the main
line of the Canadian Northern rail-
way but the other lines already com-
pleted, but circumstances might arise
which affect the position of the prov-
ince in dealing with the lines not yet
built.

"Instead of dealing with a man
of means they were now practically
dealing with a bankrupt. The prov-
ince, however, is imprudently guar-
anteed the money raised on Canadian
Northern bonds, guaranteed by the
province of Alberta, is deposited in
the banks to the credit of the treas-
urer of the province of Alberta and
can only be paid out upon certificates
of the engineers showing the amount
of work done upon these lines. The
only danger is that the banks might
be tempted to loan money to the
Canadian Northern on the strength
of the money deposited in Alberta on
account of lines to be constructed in
Alberta.

"If that were done the Canadian
Northern might, suppositively, use the
money borrowed in the east from the
banks which held the deposits in the
west, and use it for construction of
lines in the east. There is no pos-
sibility of the money raised on Al-
berta branch lines, guaranteed by
the provincial government, being

SYNOPSIS OF COAL MINING REGULATIONS

COAL mining rights of the Dominion, in
British Columbia and Alberta, the
Yukon Territory, the Northwest Territories
and the Province of Ontario, may be leased for a term of twenty-one
years, or longer, under the provisions of the Coal Mining Act, R.S.C. 1906,
c. 28, s. 2. The area of land to be leased must be at least 250 acres, and
must be situated in one of the following areas:

Application for a lease must be made by the
applicant in person to the Agent or Sub-Agent
of the district in which the rights applied for
are situated.

In approved territory the land must be de-
scribed by sections, or large subdivisions of
sections, and in unapproved territory the tract
applied for must be sketched out by the ap-
plicant himself.

Each application must be accompanied by a
fee of \$5 which will be refunded if the rights
applied for are not available, but not otherwise.
A receipt shall be paid on the prepayable
output of the mine at the rate of five cents per
ton.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

shall be furnished at least once a year.

The land to be leased must be surveyed and
the survey must be approved by the Agent.
The survey must be made by a person who
is a member of the Dominion Lands Agency,
or a person who is a member of the Dominion
Lands Agency, or a person who is a member
of the Dominion Lands Agency, or a person
who is a member of the Dominion Lands
Agency.

The person operating the mine shall furnish
the Agent with a return showing the quantity
of coal produced, and the cost of mining, and
pay the royalty thereon. If the coal min-
ing rights are not being operated, such return
shall be furnished at least once a year.

Local and General

Harold Lank was up from Cowley over Sunday.

E. S. Volume, of Fernie, was in town on Monday.

H. E. Lyon paid a business visit to Spokane this week.

Miss Ross Banamert returned from Lundbreck this week.

BORN—On Tuesday morning to Mr. and Mrs. H. E. Lyon, a son.

J. S. McEachren paid a business visit to Pincher Creek on Wednesday.

Benedicta have no army in Blairmore—not sufficient female volunteers.

Detective Sergeant Piper, of the R.N.W.M.P., came to town on Wednesday.

Mrs. Kidd's maternity home, Box 95, Phone 151. Wedding cakes decorated.

Oil. A young lady of Blairmore has a claim—one foot from Pincher Creek.

Coleman is to have a separate school, to be erected by the Roman Catholic church.

G. A. Passmore, after a brief holiday, has resumed his duties at the local depot.

The oil fever is still at a high temperature, and but few placards have been removed.

A. Morency has moved his plumbing and tin-smithing establishment to Ninth Avenue.

Harry Menzies, late of P. Burns Blairmore branch, is now in the firm's head office at Calgary.

R. Holmes, of Coleman, occupied the pulpit at the Presbyterian church on Sunday night last.

A shadow social and dance will be held in the opera house tonight, and promises to be well attended.

Rev. W. H. Muncester occupied the pulpit at Knox Methodist church, Frank, on Sunday night last.

See the F. M. Thompson Co.'s mail elsewhere in this issue for specials in Oranges, Berries, Plums, Apples, Peaches, etc.

H. G. Benson, who has lately become bereft, and who has a furnished room, is looking for a partner—not for life, but for a time.

M. E. Schofield, who was in such a critical condition last week as a result of an attack of fever, is much improved and now resting more quietly.

R. E. Campbell, M.P.P., was in town on Monday, and incidentally took a run over the highway through this section, which is just receiving repairs.

A large ditch near the local brewery presents a glaring trap for children playing in that neighborhood, and should be attended to by those responsible.

Mr. A. Pharesard, who has managed coal mines in France for several years, has been appointed assistant manager of the West Canadian Collieries, Ltd.

E. M. Brown suffered from a gumb-"oil" last week, and Dr. Mackay started drilling operations on Friday. It is difficult to operate on the "pet, rille-um!"

A young man of forty-seven or so has become very much interested in a young lady at Pincher Creek, and his trip in that direction this week has caused curious ones to sit up and think.

The basket ball team of the Coleman public school has issued a challenge to the Blairmore school team to play a tournament on July the first, and we understand that the challenge has been accepted.

The last Sunday in July will be observed as anniversary Sunday at Central Baptist church. We understand that Rev. J. C. Sycamore, of Calgary, will be the preacher. Many of our people will recall with pleasure Mr. Sycamore's visit here last year, when he presided over similar services.

Several oil seepages have been discovered in the Frank slide during the week. The west-bound train was held up there for six minutes by a gusher on Saturday night last.

No wonder Dad Crane's granary slid from its foundation at Mud Lake! Why, the whole earth down there is so saturated with oil that it is impossible to even motor or walk over its surface.

See the large bills of the Blairmore Trading Company just out, announcing a fifteen days' sale. Their sale commences Saturday, June 6th, and goods in all lines have been marked down.

The plant of the Dominion Flour Mills, Ltd., at Hamilton, Ontario, was destroyed by fire this week. The loss is estimated at \$100,000. D. B. Woods, brother of J. E. Woods, was manager of the plant.

Rev. T. M. Murray, of Coleman, left on Monday for Woodstock, Ontario, where he is to be commissioner at the general assembly of the Presbyterian church. Mr. Murray will be absent about two weeks.

In a mad rush to catch the west bound train at Frank on Sunday night last, a young Blairmore lady enjoyed a ride on the shoulder of her courageous admirer who has evidently been a pack-horse in his day.

We regret to learn that Mr. Alex. Cameron, ex mayor of Coleman, who but recently was obliged to quit business in Coleman owing to failing health, has been confined to hospital at Kingston, Ontario. Mr. Cameron's numerous friends in this district earnestly hope for his speedy recovery.

Two laborers met with a mishap at McLesren's mill last Friday, by being caught on a carrier. Both sustained minor injuries from which they have already nearly recovered. A rumor was circulated through this section since the accident that one of the men, Mike Johnson, had died from the injuries received.

Mr. Elouard Rason, one of the directors of the West Canadian Collieries, spent last week in the Pass. Mr. Rason is one of the most prominent manufacturers of the north of France and has large interests in Canada. Mr. Rason was accompanied by Madame Rason and Mr. A. Ghequier, general secretary of the West Canadian Collieries, Ltd.

The joint annual picnic of the Baptist and Presbyterian Sunday schools was held at the north-side on Wednesday afternoon, and was attended by about two hundred children and grown-ups. The programme of the evening included various games, not the least interesting being a baseball try between teams picked from the schools. After a well-played game the score stood 19-17 in the Baptists' favor.

Benson, with the assistance of other gentlemen and several ladies, referred the game so satisfactorily that he ended his arduous task without having to carry with him the customary token of appreciation, the black eye. In the swimming event only two entered the water, J. H. Farmer winning out around one point. Luncheon was served about 3.30 p.m. The weather was all that could be desired, and the grounds were never in better condition. The committee deserves the highest commendation upon the success of the affair.

ATLANTA — GEORGIA

The Indiscreet Judge

Twas on a summer afternoon,
The judge's work was done,
He sat beside his office door
Just basking in the sun.
He looked his massive office door
And hailed a passing car.
He spoke to people on the street
Whether from near or far.
His footsteps reached a concrete wall
A door there stood ajar.
He wandered most unconsciously
Into the spacious bar.
From there he staggered up the stairs,
His face it fairly shone;
He mumbled to himself some words
Which we would not have known.
Along the great hallway he paced
While others watched the fun,
With a loud hiccup he opened up
The door of "thirty-one."

Some idle gaffer turned the key
The judge he seemed to creak
And cried aloud unto the crowd
The door to open up.
For said he to himself "I'm caught
As sure as light of day,
For Mary'll face me like a shot

For Sale or Rent, a large nine-room house, suitable for boarding purposes, nicely located, at present occupied by James Warner, Blairmore. For terms, etc., apply to L. H. Putnam, Blairmore, Alberta.

Liquor License Ordinance

APPLICATION FOR

TRANSFER OF LIQUOR LICENSE

Application has been made by John Aaron Osborne for consent to the transfer to himself of the license granted Fritz Sick in respect to the Alberta Hotel, situate on lots eight (8), nine (9) and ten (10), Block two (2), Plan "Blairmore 3519 L," Blairmore, Alberta.

It is necessary that this application will be considered by the Board of License Commissioners at a meeting to be held in the License Branch Offices, 209 Commercial Travellers' Building, Calgary, on Thursday, June 25th, 1914, at 10 o'clock A.M.

DATED AT EDMONTON, this 25th day of May, 1914.

JOHN D. HUNT,
Acting Deputy Attorney-General.

With hair all standing gray."
The judge grew red and blue by turns,—
His time he knew had come,
While Mary spoke both loud and long
The judge was most struck dumbly,
And her eyes grew dim as she said to him
"Out of here, you dirty bum!"
So now 'tis said he was advised
To catch the early train
For "thirty-one" in that very house
Is the home of a local dame.

MAKING HENS PAY

It is simply a matter of making them lay—and making them lay is a matter of keeping them in good health and keeping up their appetites. International Poultry Food Tonic is a mixture of herbs, vitamins and special salts, fed to them in very small quantities, supplies the very seeds of their system, and wards off disease, and by its special action on the egg-producing organs makes them lay. It is absolutely guaranteed to increase the production of eggs. Try feeding your hens International Poultry Food Tonic and you will be surprised at what they will do for you.

FOR SALE BY ALL DEALERS

TO PREVENT CAR SHORTAGE

Car Efficiency Best Promoted by Co-Operation

The Board of Trade News of Toronto, recently printed an article on how best to prevent car shortage and among other things points out that car efficiency can best be attained in the following manner:

1. By the satisfactory handling of traffic with the least number of cars, which can best be accomplished by the ordering of cars of suitable dimensions and loading same to their full capacity.

As an illustration: Assuming a tonnage of 5,000,000 tons is loaded and transported in 250,000 cars, or twelve tons per car. An increase in the load to 15 tons would result in the same tonnage being transported in 200,000 cars, thereby freeing 50,000 cars for other service. A firm shipping 500 cars of 12 tons each for 300 working days, by increasing the average load per car to 15 tons, would save the same volume of traffic in 150 instead of 160 cars.

2. Handling the business in the smallest number of car days. The railways should transport the freight quickly, supplemented by prompt loading and unloading of cars by their patrons. The full free time permitted by the Car Service Rules should not be taken advantage of unless actually necessary.

3. Shippers and consignees should ascertain whether the facilities are amply sufficient to ensure the prompt handling of their freight, and the ordering of cars for loading and unloading should be so arranged as to lose no time in handling when placed. The News believes that the public as well as the railways have duties to perform to prevent a shortage of cars.

In a certain small English village there were two butchers living on the same street. One placarded his sausage stand with one shilling a pound, and the rival promptly placed eight pence on his card. Number one then placed a notice in his window saying that his sausages under one shilling could not be guaranteed. Number two's response to this was an announcement that his spiced sausages to the king. In number one's window the following morning appeared an extra large card bearing the words "God Save the King."

Oh, That This, Etc., Etc.
Maud—Whenever Mr. Statlay calls he makes me think of Hamlet.
Ethel—Why not?
Maud—Like Hamlet, he "cannot resolve himself into action."

Money Wasted
With a very weary sigh she tossed the magazine aside.

"What is the matter, dear? her husband asked.
"I've read nearly every story in this thing," she said, and I haven't found a line that I should read, my daughter to see, if I had one. It's 15 cents wasted."

After the Engagement
Mother—"I suppose, dear, that Jack will be coming round to see me?"
Daughter—"Oh, that's all right. He said he had seen you and he wanted to marry me just the same."

She Was Helpless
FOR TWO YEARS

WHY MR. BALDWIN RECOMMENDS DODD'S KIDNEY PILLS

She Could Find Nothing to Cure Her Rheumatism Till On a Neighbor's Advice She Tried Dodd's Kidney Pills.

St. Walburg, Sask.—(Special.)—I, Mrs. Baldwin, a kindly respected resident of this place, and Mrs. Baldwin gives her reasons.

"I was nearly helpless with rheumatism for two years," she states, "I got medicine from the doctor, and tried every other remedy, but nothing helped me. Then one of my neighbors advised me to try Dodd's Kidney Pills. I bought four boxes, and they helped almost from the first. I have used nearly two dozen boxes and am nearly cured."

That rheumatism is one of the results of diseased kidneys is again shown in Mrs. Baldwin's case. She had headaches, stiffness of the joints and backaches, her sleep was broken and unrefreshing, and she was always tired and nervous. Her limbs ached and she was always thirsty. There are all symptoms of diseased kidneys. When she cured her kidneys with Dodd's Kidney Pills the symptoms vanished—and so did the rheumatism.

Guarded Statement
There's something very simple and charming and direct about the American girl. One, in the far west, I married a pretty American girl to a cowboy.

Do you take this man for better or worse? I asked her.
She shrugged her supple shoulders. I can't tell till I've had him awhile, she said.

Mother's Value "His Oils"—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Eucalypti Oil, because experience has taught them that there is no better preparation to be had for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Church—What part did he take in the play?
Gotham—He took the part of a janitor of a flat.
Was it true to life?
Sure, the house was cold.

A Girl at Right
Mark Twain, so the story goes, was walking on "Tomball street" when he met a woman with her youthful face. So this is the little girl, eh? Mark said to her as she displayed her children. And this sturdy little urchin in the bib bonnet, I suppose, to be the next.

Yasash. The woman replied: yasash, that's a girl, too.
The Cleveland physician who ran over a holdup man has discovered a new and promising way for the auto-Extremes meet, but they don't always speak as they pass by.

Larger Yields per Cow

During these short winter days when many cows are dry, and the cows that are milking are not giving very much, it is not wise to lay down for improvement of the dairy herd.

Seeing that the average household consumer a fair quantity of milk daily all through winter, and seeing that the ice cream trade is not by any means dead during the cold months, it is not a pity that there is not more good milk and sweet cream available. Current prices and good demand should prove an inducement to a large number of producers to go in more strongly for winter dairying.

Some of the variations in yields are very marked; it is a common thing month after month to find groups of cows in four adjacent sections averaging one hundred pounds of milk difference, for instance, from 450 by even stages of 100 up to 750 pounds. Some of these poor cows could possibly be giving under better conditions of feed and care, another three or four pounds for each per month; after a year or two at cow testing the herds will probably average, as many already are, a much larger amount of milk than that, even as much as forty or forty-five pounds in the year extra per cow.

DO LONG BREATHS HURT?

DAUGHTER OF PLEURISY ALWAYS BEGIN THIS WAY

Speedier Cure is Nervine.

Ouch, that tab-like pain in the side is like a hot knife blade in the ribs! Probably got overheated—cooled too fast—now there is congestion, tightness, such soreness you can't draw a long breath.

This is the beginning of Pleurisy. Pleurisy is far too serious to neglect a minute instant.

Quick relief will come from a vigorous rubbing with Nervine. This trusty old pain reliever will fix you up in half an hour, take away the congestion—make you well just as it did Mr. Samuel S. Johns, of Stamford, Conn. "I was running to catch a train last week I became much overheated, I put up the train window and rode the way in order to get cooled off. In an hour my side was so full of pain and my breathing hurt so much that I thought I had pneumonia. I always carry Nervine in my grip and at destination I rubbed my side therewith. The next morning the worst of the troubling effect was soon noticeable and I quickly got relief. Nervine I consider the best remedy for such ailments."

Any sort of a cold can be quickly broken up with Nervine which is a powerful, neutral, soothing, and refreshing. Nothing more soothing or powerful. The 50c. large family size is the most economical. Small trial size 25c. at dealers everywhere.

Lydia found her father in the library. "Father, she said, did Robert call on you this morning?"

Yes, he did, replied the father; but I couldn't make much out of what he said. What do you mean?"

Well, explained the old gentleman, I understood him to say that he wanted to marry me, and that he had enough to support his wife and to give me home and write it out."

Lydia found her father in the library. "Father, she said, did Robert call on you this morning?"

Yes, he did, replied the father; but I couldn't make much out of what he said. What do you mean?"

OLD DUTCH CLEANSER

"Old Dutch" cleans wood-work and floors easily and quickly. Removes the dirt, and the cows that are milking are not giving very much, it is not wise to lay down for improvement of the dairy herd. Seeing that the average household consumer a fair quantity of milk daily all through winter, and seeing that the ice cream trade is not by any means dead during the cold months, it is not a pity that there is not more good milk and sweet cream available. Current prices and good demand should prove an inducement to a large number of producers to go in more strongly for winter dairying. Some of the variations in yields are very marked; it is a common thing month after month to find groups of cows in four adjacent sections averaging one hundred pounds of milk difference, for instance, from 450 by even stages of 100 up to 750 pounds. Some of these poor cows could possibly be giving under better conditions of feed and care, another three or four pounds for each per month; after a year or two at cow testing the herds will probably average, as many already are, a much larger amount of milk than that, even as much as forty or forty-five pounds in the year extra per cow.

DO LONG BREATHS HURT?

DAUGHTER OF PLEURISY ALWAYS BEGIN THIS WAY

Speedier Cure is Nervine.

Ouch, that tab-like pain in the side is like a hot knife blade in the ribs! Probably got overheated—cooled too fast—now there is congestion, tightness, such soreness you can't draw a long breath.

This is the beginning of Pleurisy. Pleurisy is far too serious to neglect a minute instant.

Quick relief will come from a vigorous rubbing with Nervine. This trusty old pain reliever will fix you up in half an hour, take away the congestion—make you well just as it did Mr. Samuel S. Johns, of Stamford, Conn. "I was running to catch a train last week I became much overheated, I put up the train window and rode the way in order to get cooled off. In an hour my side was so full of pain and my breathing hurt so much that I thought I had pneumonia. I always carry Nervine in my grip and at destination I rubbed my side therewith. The next morning the worst of the troubling effect was soon noticeable and I quickly got relief. Nervine I consider the best remedy for such ailments."

Any sort of a cold can be quickly broken up with Nervine which is a powerful, neutral, soothing, and refreshing. Nothing more soothing or powerful. The 50c. large family size is the most economical. Small trial size 25c. at dealers everywhere.

Lydia found her father in the library. "Father, she said, did Robert call on you this morning?"

Yes, he did, replied the father; but I couldn't make much out of what he said. What do you mean?"

Well, explained the old gentleman, I understood him to say that he wanted to marry me, and that he had enough to support his wife and to give me home and write it out."

Mistress—So the moving pictures you saw at the Rob Roy were very bad, were they, Mary?
Maid—Yes'm very; but next week's pictures won't be any better. The bill-board says the Lassie film will be shown.

One Improvement
My dear, said Miss Newlywed, her face flushed with excitement from her afternoon in the kitchen. "want you to be perfectly frank with me now; what would you suggest to improve these doughnuts I made today?"
Well, replied Mr. Newlywed, lifting one with a slight effort, I think it might be better if you made the hole bigger."

Minard's Lin. cent Co., Limited.
Some time ago I had an attack of Quinsy which laid me up for two weeks and cost a lot of money. Finding the lump again forming in my throat, I bought freely with MINARD'S LINIMENT, and saturating a cloth with the liniment left it on all night.
Next morning the swelling was gone and I attributed the warding off of an attack of Quinsy to the free use of MINARD'S LINIMENT.
G. E. WORDEN, St. John.

Those upside down blunders that have stirred London society are no new thing. They are common on board ocean liners and great lakes ships.

High and Low
Naturally the clergyman was annoyed when the water asked if the luncheon party would be High Church or Low Church. "What on earth has that to do with you?" he demanded. A great deal, sir, explained the waiter, if your friends are High Church I must provide more wine; if low church, more wit!

Inognito

The Story of a Royal Marriage

By MAY C. ETHERIDGE

"I am tired," said Prince Adolf, "of having people gaze at me whenever I appear."

"Your royal highness," said an eunuch, entering, "a man has been brought to the palace by the police charged with poisoning you, the prince. He resembles you so closely that there is no doubt that he is not certain whether he is or is not an impostor. What orders shall I give as to his disposition?"

"Is he much like me?"

"So nearly that he had not been poorly dressed, I who am in constant attendance upon your highness, could not tell him from you."

"Bring him to me."

The eunuch disappeared and in a few minutes entered, conducting the man in question. The prince started at the marvelous resemblance to himself.

"Why have you permitted me?" asked the prince.

"For fun, your highness."

"How would you like to impersonate me for a consideration?"

"I am at your royal highness' service."

The prince made a deal by which this man, Shuster, was to impersonate him.

The conspirators could not, of course, go so far as to have a public marriage celebrated between the two, so it was arranged that Shuster and the prince's representative should be married privately—that is, in the spurious privacy of the palace.

The day of the wedding was proclaimed. The prince's representative announced that he had won the lady's consent, and the prince and his fiancée agreed that the marriage should be celebrated that same evening in the private chapel of the palace.

A few of those most intimate with the prince were admitted to the secret and to the ceremony. All watched the proceedings with great gusto. Nothing could be more interesting than a marriage between two composites, each thinking the other to be of royal blood. Many comments were passed on the pair, the most frequent of which was that, though composites, each possessed the carriage and dignity of a person of the blood royal.

The groom had anticipated the bride immediately after the ceremony he should take his bride whither so ever he pleased and no question of the pair had been raised when they stepped into one of the royal carriages and were driven away.

That night the prince disappeared. On the dresser in the apartments was found a note stating that his name was Herman Shuster. He had perished in the palace, and his body had been found in the courtyard. The prince's representative had suddenly decided to enter in his own private person. He had fallen in love with the prince's representative and married her.

The prince's representative, mortified, gave orders to cease the preparations for the wedding that was to take place that day at high noon and shut herself in the palace. The prince's representative had suddenly decided to enter in his own private person. He had fallen in love with the prince's representative and married her.

Within a few days strange news came from a neighboring kingdom, that the prince's representative had recently died and left the throne to his daughter. The young queen was much beloved by her subjects, being given to charity. She was used to going among the poor and the institutions for the poor in the name of the prince.

When the prince's representative died, the queen was much beloved by her subjects, being given to charity. She was used to going among the poor and the institutions for the poor in the name of the prince.

The prince was much relieved and pleased at being able to buy a pair of stockings or a necktie without having a crowd about him, keep back to his fiancée by the police. He wrote his fiancée of his ease and that he would arrive inognito, his personator coming in state. The prince's representative was much pleased, not so much at the resemblance as the carriage, for the lady had the bearing of one of high degree. Some difficulty was met with to induce her to act the part of princess, but at last she consented and began her official duties in impersonating the prince.

The marriage between Prince Adolf and the Princess Wilhelmina was a state marriage and had nothing to do with love. Indeed, the two had met but once—when the marriage contract was signed. But this made little difference so far as the prince's representative and the wedding were concerned. According to the arrangements, when a carriage drove up to the palace, the two princesses would alight and the prince would be received by the princess's personator, the princess herself standing back and enjoying the farce that was being enacted.

"What a joke it would be," she said to herself, "if these two could be brought to marry, each thinking the other to be of princely blood! As soon as the prince arrives I shall propose the plan to him."

She did propose the plan when her fiancée arrived the same evening and was admitted through a rear door of the palace. The prince was evidently much struck with the proposal and said he would think it over. He expressed a desire to see his man, Shuster, with a view to giving him further information as to the part he was to play. He was introduced to his apartments. What passed between them was not known, but after a few days the prince's representative at the prince's side had proposed her plan to Shuster.

It had been arranged that the prince's representative should be married to the prince's representative, then the wedding, after which there should be another week of rejoicing. The prince's representative was much interested in the plan, and the prince's representative was much interested in the plan, and the prince's representative was much interested in the plan.

MODERN SUPERSTITION.

Owls and Skirts, Pigs, Dogs and Cats.

Pretty nearly everything under the sun seems to be connected with some superstition, from an owl to a pig, from a skirt to a dog. Never hear of either? Well, if your skirt happens to be turned up a bit at the bottom, you can be sure someone is thinking of you. You can, however, make everyone think more, especially the men, if you wear a skirt that is for the owl, if it should come into the house, trouble is sure to follow. The best thing to do when you expect an owl is to put all the cut glass into the china closet and the china closet in the dining-room closet; and then lock that closet. For the owl you can then use anything; a broom is generally pretty handy.

The first time pigs cross your threshold, make them jump over a pattern, or, if you have a dog, or the maid's apron; then they will come home regularly. A plan not in use in the old days, but Canadian farmers is to keep the pigs in regular pens and feed them twice a day, and the pigs are much more popular with the wife and the maid.

It is bad luck to hear a dog bark at night. This superstition has been found to depend on circumstances; it is not a rule, but a suggestion. If the dog next door, the best thing to use is a fat iron; but a good aim is even better.

Women believe that, if they go somewhere on Monday, they will be on the go the rest of the week. That may be the explanation of the fact that women like to wash on Monday. If a cat, as a person, is lucky for seven years; there is, however, no special superstition as to cats, so it is best to begin on your cat's claws.

The Germans believe that, if your right hand itches, you will get money. If your left hand itches, you will spend much. Canadians are the only people in the world who have both hands itching all the time.

Reveries.

An insurance agent was trying to induce a hard man to deal with to take out a policy on his house. After listening to him for an hour while he painted in vivid colors the extreme danger of fire consuming the house, there the royal marriage was celebrated. Shuster announced that he had won the lady's consent, and the prince and his fiancée agreed that the marriage should be celebrated that same evening in the private chapel of the palace.

A few of those most intimate with the prince were admitted to the secret and to the ceremony. All watched the proceedings with great gusto. Nothing could be more interesting than a marriage between two composites, each thinking the other to be of royal blood. Many comments were passed on the pair, the most frequent of which was that, though composites, each possessed the carriage and dignity of a person of the blood royal.

The groom had anticipated the bride immediately after the ceremony he should take his bride whither so ever he pleased and no question of the pair had been raised when they stepped into one of the royal carriages and were driven away.

That night the prince disappeared. On the dresser in the apartments was found a note stating that his name was Herman Shuster. He had perished in the palace, and his body had been found in the courtyard. The prince's representative had suddenly decided to enter in his own private person. EGG STANDARDS.

List of Trade Designations and the Eggs Represented.

With the high price of the really new-laid egg comes the plea for the standardization of eggs since the terms used by eggshoppers are hopelessly misleading. What is regarded as a new-laid egg in one district may be an old egg in another. A "fresh" egg may have attained the respectability of three months, but there is nothing to convey to the purchaser this all-important fact.

To designate the age of commerce, a correspondent has drafted the interpretation he places upon the five terms, and in other respects as laid down above. These alone are recommended for boiling:

Breakfast—This, it is expected, the same, says that as they are a few days older, there is a slight abrasion on the one he thinks touched. For poaching or frying these are excellent.

Breakfast—This, it is expected, the same, says that as they are a few days older, there is a slight abrasion on the one he thinks touched. For poaching or frying these are excellent.

YAN HORNE'S TREASURES.

His Catalogue Every Item and Describes It Himself.

Pictures comprise after all only a part of Sir William Van Horne's treasures, about which so much has been written since there was talk of presenting them to a museum. He has a wonderful collection of the beautiful things which come under the general heading of "objets d'art." Many of the world's greatest past and present master craftsmen are represented in this collection. And every object in the collection—there are hundreds of them—has been catalogued by "Sir William himself."

His method of cataloguing is unique. As each object is acquired in a thumb-screw, a watercolor sketch of it in "day journal," accompanying the sketch with a description of the object, where it was purchased, who made it, its history (if any), and every particular regarding it, the artist's own watercolor sketch is in itself a masterpiece. Every line, mark, and variation of coloring is described in the most marvelous detail is revealed when the sketch is examined under a magnifying glass.

Later all this is copied into a general catalogue, but instead of a thumb-screw, a watercolor sketch of it in "day journal," accompanying the sketch with a description of the object, where it was purchased, who made it, its history (if any), and every particular regarding it, the artist's own watercolor sketch is in itself a masterpiece. Every line, mark, and variation of coloring is described in the most marvelous detail is revealed when the sketch is examined under a magnifying glass.

Bellevue Happenings

T. M. Burnett returned to camp
on Monday.

Joseph Stephenson returned to
camp during the week.

James Turke paid a business
visit to Fernie this week.

Mrs. Thos. Taylor and family
left camp this week for Coalmont,
B.C.

Harry Bolton left camp this
week for his home in the old coun-
try.

Mr. and Mrs. Fred Beal, of
Frank, were visiting in camp on
Sunday.

A lacrosse team composed of
Bellevue and Frank players has
been formed.

Mr. Delaney, the electrician, has
moved his family to Frank, where
he has secured a position.

Quite a crowd of Bellevue sports
took in the Frank-Corbin football
game at Frank on Saturday.

The stork visited the camp this
week and left a daughter at the
home of Mr. and Mrs. Harry
White.

Mr. and Mrs. Thomas Bradley
were visitors in camp on Sunday,
the guests of Mr. and Mrs. James
Redford.

Mr. Fairhurst, of Coleman, oc-
cupied the pulpit of the Methodist
church here on Sunday last, in the
absence of Rev. Mr. Irwin.

The population has grown con-
siderably lately, and daughters
have arrived to Mr. and Mrs. J.
F. Simpson and Mr. and Mrs. Wil-
liam Newton. All are doing well.

Dr. J. C. Miller, director of tech-
nical education, was in the camp
this week and met the school
trustees. He is making arrangements
for technical schools in The Pass
for next winter.

Between forty and fifty men
listened to a fine address by Rev.
W. H. Irwin, of Bellevue, Sunday
afternoon on "Some Solutions of
Economic Problems." The speaker
proved conclusively by the way he
handled the subject that he had
made no mere superficial study of
present-day economies. Mr. Irwin
will receive a hearty welcome any
time he may make a return visit.
The Misses Ames and Hazen sang
a beautiful duet in splendid voice.
Lethbridge Herald.

Morency Suffers From A Baseball Invasion

In the game last night, Morency
received a complete knockout
under the left jaw. However,
after taking the count he
surprised himself by scoring
an inning.

Publications On Agriculture

The Department of Agriculture at
Ottawa has available for free dis-
tribution upwards of two hundred
publications including reports, bul-
letins and circulars. These have been
issued, from time to time, by the
several Branches and deal with
almost every phase of agriculture
science and practice. A list of these
has been printed in pamphlet form
giving the title, author, and date of
each. This list is for free distribu-
tion and may be procured on
application to the Publication Branch
of the Department of Agriculture at
Ottawa.

Frank Happenings

M. Gustave Lavoie and George
Boyes spent the week end at Pincher
Creek.

Colonel A. S. Tetton, manager of
the Union Bank of Canada,
Pincher Creek, and party, motored
to the Sanatorium for dinner on
Sunday last.

Eleven barrels of gasoline were
unloaded at Frank station on Tues-
day last. Do not be surprised if
in the near future you hear of a
gusher in the Frank slide.

An opposition oil company has
been promoted at the Sanatorium.
We understand that R. Waldo
Thompson has consented to act as
president of the new company.

A New York photographer called
at the sanatorium last week and
took a photograph of the genial
manager, and we learn that The
Enterprise is to be presented with a
proof.

Signor Owen de Cooney has re-
turned from a three days' trip to
Calgary. While there he made
extensive purchases for his ward
robe. The sterner sex of Frank
now consider Owen their fashion
plate.

Jake Wheeler, auditor of the
Squedunc-Coutouray Oil & De-
velopment Co., Ltd., has audited
the company's holdings in the
Frank slide. He reports three
seepages. It was Thursday after-
noon of last week that Jake did
the auditing.

How Morency Took The Count

Empress Victims Were Not Drowned

Quebec, June 3.—More than nine-
tenths of the victims of the Empress
of Ireland disaster, whose bodies have
been recovered, were not drowned; they
were killed in most cases instantly or subse-
quently by falling wreckage and debris.
This statement, made on Monday by the
officials at the mortuary pier following in-
vestigation by the embalmers and under-
taken, accounts for the large number of
the dead bodies which survivors have re-
peatedly maintained were floating in the
water all about them.

There is no doubt that nearly all
were killed by injuries received before
they were sent into the water at all,
said Norman A. Craig, of Toronto, in
confirming the announcement. Mr. Craig
was summoned here to assist in the em-
balming.

While no official statement has yet
been issued from the C.P.R., marine
men here say that there is no doubt that
efforts will be made to raise the founde-
red Empress. She is lying at the bottom
on her side in 180 feet of water at full
tide. Her injuries are very extensive,
according to the statement of those of her
crew who manned the boat immediately
lowered after the collision to ascertain
the damage done. Several wrecking cor-
porations have already tendered for the
work of raising the liner.

In addition to an unusually valuable
salvage, the Empress carried a quantity
of silver, consigned from Cobalt to Lon-
don. She also carried a very large and
valuable burden of mail.

On two bodies recovered gold and se-
curities to the amount of \$23,000 were
found. Mr. Henderson, of London, Eng-
land, had three drafts netting \$14,000
and \$1,000 in gold in a belt strapped
around his body. Miss Ruth Morton, of
Ferne, had securities for \$6,000 on her
person.

Mrs. Gresham fell into the river oppo-
site the tennis court on Wednesday after-
noon, and may have drowned were it
not for the prompt rescue effected by
Mr. Farmer. Mrs. Gresham received
several slight injuries, as a result of which
she has since been confined to her home.

Frank Happenings

Mrs. Godfrey, of Medicine Hat,
is visiting Mrs. A. J. McKinpon.

Mrs. A. Wardman, of Burin,
was in town on Saturday last.

T. Label, of Pincher Creek, was
in town on Monday, and registered
at the Sanatorium.

Mr. Graham, manager of Corbin
mines, was down on Saturday last
to see the football game.

Frank's football stars will go to
Ferne on Saturday, June 6th,
leaving Frank on the 8.15 train.

A bachelors dance will be held
in the union hall on Wednesday
night next, when all the "knock-
abouts" are requested to be present
to make their choice.

A. J. Carter and Mr. McDonald,
of Fernie, was down on Saturday
last to consider with Mr. Windsor,
of Bellevue, the Coal Creek protest
re the Frank-Coal Creek game.

Several of the boys have taken
up very unique styles of training.
Paddy and Shorty say that pulling
the washing machine is far ahead
of kicking a ball. Stay with it,
boys!

We understand that our football
captain has had a very strong
proposal for marriage. His decision
is still hanging in the balance, and
we hope he will turn it down to
stay with us for another year.

The following team will go to
Ferne for the big game on Satur-
day: Paton, goal; Marples and
Watson, backs; Pettit, Tietum
and Miller, half-backs; Jordan,
Sloan, Parker, Marsh and Ifulton,
forwards.

A smoker was held in the union
hall by the Frank and Corbin boys
after the game on Saturday. The
game was free from net loss upon
all high Corbin lost, they were
practically as if it had and promised
a good time to the Frank boys on the
occasion of a return game.

On Sunday last, while attempt-
ing the rescue of one of Blairmore's
most fair and enchanting ladies
from being thrown out of an auto-
mobile by S. Coutouray Worthing-
ton's foot slipped, and now he is
limping around with a sprained
ankle. Andrew Carnegie has al-
ready visited the noble S. Coutouray,
commending him for his
bravery and advising him that he
is sending his butler post-haste to
present the said S. Coutouray with
one of his notorious medals for
bravery. The Sanatorium has now
a hero within its walls.

Frank had Corbin at home on
Saturday last before a good attend-
ance. Frank won the toss and
started the first half down hill. It
early became evident that Frank's
eleven had their work cut out for
them; for Corbin showed great
combination football, and had the
best of the game in the first half.
Several times Corbin came danger-
ously near, but Paton buttressed
there every time Frank missed
several openings. There was no
score in this half. On resuming,
Frank began to put pressure on
and Parker almost broke through.
Corbin broke away and tested
Paton who made a fine save.
Frank continued to press and after
twenty minutes Sloan placed the
ball in the net. Corbin tried hard
to equalize, but the home half-back
line broke their combination every
time, and at the call of "time"
Frank was the winner by 1-0.
Corbin deserve credit for the ex-
cellent game they put up, but they
recognize Frank as a hard nut to
crack. J. Shands, of Hillcrest, hand-
led the game in an excellent manner.
The teams were as follows:

FRANK
Paton, goal.
Marples and Watson, backs.
Pettit, Tristram and Miller, half-
backs.
Sloan, Morrison, Marsh, Parker
and Hulton, forwards.

CORBIN
W. Walker, goal.
Clark and Strand, backs.
Jackson, White and Harlin,
half-backs.
Haydon, D. Stobhard, Overton,
R. Stobhard and W. Bell, forwards.

Lethbridge Labor Men May Recall Commission

Lethbridge, June 2nd.—Mayor
Hardie and Commissioners Grace
and Reid may be turned out of
office. At a meeting of the trades
and labor council Thursday night
a resolution was passed setting
forth that the city officials have
practically ignored the work-
men, and that they should conse-
quently suffer under the recall
clause in the charter. The resolu-
tion is not available for publication,
but it was passed last night, and a
committee, consisting of the fol-
lowing, was appointed to create the
wheels of the recall and to put the
machinery into operation: Messrs.
W. H. Pawles, Thompson, Dill,
Ritchie and McNabb.

At the last meeting of the labor
council a committee was appointed
to adopt a resolution and submit
the same to the whole council.
Some of the appointees objected to
acting, but the matter was finally
brought to a head last night.

It is alleged that the commis-
sioners have failed to give the
people a businesslike administra-
tion, and that they have not given
the workers the consideration they
deserve, and they have all com-
mitted indiscretions that warrant
these drastic steps. It is also
alleged that Commissioner Grace
approached the officials of the Gas
company with a request that they
cut their wage scale.

The mayor is accused of various
indiscretions, and it is stated that
his story on conditions in Mexico,
recently published in The Herald,
in which he discussed the religious
phase of the Mexican situation, is
at the bottom of much of the agita-
tion.

Another outstanding grievance
is the agitation on the part of the
commissioners for the one man ex-
ecutive, a step which is said to be
contrary to all the laws of labor,
in that it has for a basis the ex-
ecution of two men's work by one man.
Under the terms of the charter
15 per cent of the electors who
voted on the majority at the last
municipal election may by petition
institute recall proceedings.

Wedding Bells

DAMN—GOOD

An exchange says:—A quiet
wedding was solemnized at the
Evangelical parsonage, Lister-
ton, Ont., on Thursday afternoon, 8th
inst., when Miss Lena Good,
daughter of Mr. and Mrs. Wm.
Good, became the wife of Mr.
Lincoln Damm.

The Minister blushed every time
he pronounced the groom's name,
but the least he could have done
was to wish them a blankety-blank
good time.

The Way Olsen Crowds In The Stickers

A coon was arrested this morning on a
charge of vagrancy and brought before
Justice Gagliardi, who sentenced him to
three months at Mackay.

Blairmore Lodge, No. 88, meets in their
Hall, 880 Victoria St., every Tuesday at
8 o'clock. Visiting brethren welcome.
